01 / Product Vision & Mission

1.1 Vision Statement

Fast Credit Deal exists to become the most trusted loan restructuring partner for salaried Indians trapped in high EMI burdens — delivering measurable financial relief through a personalised, WhatsApp-first acquisition and conversion engine.

1.2 Mission

Build a predictable, scalable loan acquisition engine that consistently generates and converts high-intent borrowers into disbursals. The goal is to move from dependency on external lead sources to owning a full funnel:

- Content — attract high-intent salaried borrowers through education and proof
- Lead Capture — self-qualifying EMI analysis tool filters noise before first contact
- Qualification — structured scoring against disbursal-ready criteria
- Conversion — WhatsApp-first nurture turns warm leads into committed applicants
- Disbursal — bank/NBFC placement leveraging 10+ years of existing relationships

1.3 Core Problem Being Solved

The Customer Problem

Salaried individuals with 3–6 active loans and credit cards are paying ₹50,000–₹1.5L+ in monthly EMIs. They are cashflow stressed, not financially irresponsible. They have no trusted advisor to show them a realistic path to EMI reduction. Most loan agents they encounter are transactional, unresponsive, and focused on closing — not on solving.

The Business Problem

Fast Credit Deal has 10+ years of experience and active bank/NBFC partnerships but no owned lead generation system. Every lead comes from third-party sources with no control over quality, intent, or volume. The business cannot scale without owning its acquisition funnel from content to disbursal.

1.4 Operating Principle

"This is not a content business or a tech startup."
"This is a performance-driven loan distribution machine."

Every system, feature, and interaction is evaluated against one question:
Does this directly improve lead quality, conversion rate, or disbursal volume?
If the answer is no — it does not get built.

02 / Ideal Customer Profile

2.1 Primary ICP — Salaried EMI Overload

Demographics

- Age: 25–45 years
- Employment: Salaried, private or government sector
- Monthly salary: ₹40,000 – ₹2,00,000
- Location: Tier 1 & Tier 2 cities — Delhi NCR, Mumbai, Bangalore, Pune, Hyderabad
- Education: Graduate or above

Financial Profile

- Total monthly EMI: ₹50,000 – ₹1,50,000+
- Number of active loans: 2–6 (personal loans, credit cards, consumer EMIs)
- CIBIL score: 650–780 (stressed but not defaulted)
- EMI-to-income ratio: 40%–70%
- No major missed payments (last 12 months)

Psychographics

- Aware they are overpaying but don't know how to fix it
- Embarrassed to discuss financial stress openly
- Has tried calling banks and been told 'not eligible' without explanation
- Distrusts loan agents due to past experiences of false promises
- Responds to proof: real numbers, real cases, real outcomes
- Makes financial decisions based on WhatsApp conversations, not emails

Trigger Events

- Just got a salary slip and realised EMI > rent
- Was rejected for a new loan despite on-time EMI payments
- Received a debt consolidation ad that showed their exact situation
- Saw a transformation story of someone like them

2.2 Disqualified Profiles (Do Not Target)

Profile	Reason for Exclusion
Defaulted borrowers (3+ missed EMIs)	Bank eligibility is severely compromised; high rejection risk
Self-employed / business owners	Outside current niche; different product requirements
EMI burden below ₹30,000/month	Insufficient savings potential to justify consolidation effort
CIBIL below 600	Very low disbursal probability with any partner
Looking for a new loan (not consolidation)	Different intent; different product

03 / User Personas

3.1 Primary Persona — Rahul, The Overstretched Executive

Persona Overview
Name: Rahul Mehta | Age: 34 | Location: Gurgaon, Delhi NCR
Salary: ₹1,10,000/month | Total EMI: ₹87,000/month | EMI Ratio: 79%
Loans: 1 personal loan (HDFC), 2 credit cards (ICICI, Axis), 1 Amazon EMI
CIBIL: 712 | Occupation: Senior Manager, IT company

Background

Rahul took his first personal loan in 2021 for a home renovation. Then a medical emergency added a credit card. Then a car upgrade on EMI. Each decision seemed rational at the time. Today, he's giving ₹87,000 out of ₹1.1L salary to EMIs before he even sees the money in his account. He can't save. He can't invest. He's one job loss away from default.

Goals

- Reduce monthly outflow by at least ₹25,000–₹40,000
- Consolidate all loans into one manageable EMI
- Get clarity on his actual options — not sales pitches
- Work with someone who understands his profile

Frustrations

- Banks tell him he's 'over-leveraged' without offering alternatives
- Agents promise the world then go silent after document collection
- Doesn't know what a realistic EMI reduction looks like for his profile
- Ashamed to discuss this with family or colleagues

Behaviour Patterns

- Scrolls Instagram at night after family is asleep — this is when financial anxiety peaks
- Responds immediately to content that mirrors his specific situation with specific numbers
- Will engage on WhatsApp but will not call a number he doesn't trust
- Decision timeline: 7–14 days from first contact to document submission if trust is built

3.2 Secondary Persona — Priya, The Double-Income Debt Trap

Persona Overview
Name: Priya Sharma | Age: 29 | Location: Pune

Salary: ₹65,000/month | Total EMI: ₹52,000/month | EMI Ratio: 80%
Loans: 1 personal loan (Bajaj), 3 credit cards (HDFC, SBI, OneCard)
CIBIL: 688 | Occupation: Software Engineer, mid-stage startup

Background

Priya is financially literate but made classic early-career mistakes: buy-now-pay-later mentality, credit card rewards addiction, and a personal loan she took during a salary gap. She earns well but her EMI burden has eaten into her ability to build any financial safety net. She knows something is wrong and is actively searching for solutions.

Goals

- Free up ₹15,000–₹25,000 monthly for savings/investment
- Close all credit cards and move to single loan
- Improve CIBIL score as a by-product of consolidation
- Understand the process clearly before committing

Frustrations

- Online content is generic — never addresses her specific combination of loans
- Comparison sites show rates but not eligibility reality
- No one explains what happens to her CIBIL during consolidation
- Agents pressure her to decide without answering her questions

04 / User Roles & Access

The FCD system has four distinct roles with clearly separated access levels and responsibilities. Role confusion is a systemic failure — each role must have exactly what it needs and nothing more.

Role	Responsibilities	Access Level
Owner / Admin	Full system access. Sets targets, views all leads, all conversion data, all disbursal records. Manages role assignments. Access to financial reporting.	Full — read/write all modules
Sales Agent	Owens assigned leads from qualification onwards. Updates lead status, logs call notes, sends WhatsApp sequences, moves lead through pipeline stages.	Assigned leads only — cannot see unassigned or other agents' leads
Content Manager	Manages content calendar, publishes landing page updates, uploads case studies, manages lead magnet content. Cannot access lead data.	Content modules only — no CRM access
Lead Reviewer	Reviews incoming leads, scores against ICP criteria, assigns to agents or marks as disqualified. First point of contact in the lead pipeline.	Unassigned lead queue — no agent pipeline access

4.1 Role Responsibilities Matrix

Capability	Owner	Sales Agent	Reviewer	Content Mgr
View all leads & pipeline	✓	Own leads only	Unassigned only	✗
Update lead status	✓	✓	✓	✗
Send WhatsApp sequences	✓	✓	✗	✗
Access disbursal reports	✓	✗	✗	✗
Edit landing page content	✓	✗	✗	✓
Publish lead magnet	✓	✗	✗	✓
Assign leads to agents	✓	✗	✓	✗
View team performance	✓	Own stats only	✗	✗

05 / User Journey Map

5.1 Full Customer Journey — Salaried EMI Overload

The journey maps the complete path from a stranger discovering FCD content to a completed loan disbursal. Every stage has a defined touchpoint, a documented pain point, and an FCD-specific response.

1. Awareness	2. Interest	3. Qualification	4. Nurture	5. Conversion	6. Disbursal
ACTION Sees Reel or ad showing their exact EMI situation	ACTION Clicks to profile / landing page	ACTION Fills EMI Burden Analysis form	ACTION Enters WhatsApp sequence	ACTION Books consultation call	ACTION Submits documents & loan is processed
TOUCHPOINT Instagram Reel / Facebook Ad	TOUCHPOINT Instagram Profile / Landing Page	TOUCHPOINT Lead Magnet Tool	TOUCHPOINT WhatsApp (14-day sequence)	TOUCHPOINT WhatsApp / Phone	TOUCHPOINT WhatsApp + direct bank/NBFC submission
PAIN POINT Recognises the pain but has no clear solution	PAIN POINT Generic advice — no personalisation to their profile	PAIN POINT Doesn't know if they're eligible or what they'd save	PAIN POINT Agents ghost them after first contact	PAIN POINT Consultation feels like a sales push, not advice	PAIN POINT Documents collected, then silence
FCD RESPONSE EMI Trap Story Reel with specific numbers & transformation	FCD RESPONSE Single-focus landing page with ICP-specific headline & EMI calculator	FCD RESPONSE Free 3-question EMI analysis showing projected savings — pre-qualifies simultaneously	FCD RESPONSE Structured 14-day sequence: education, case study, social proof, offer — automated but personal	FCD RESPONSE Diagnosis-first call: understand profile, confirm savings, present bank options — no pressure	FCD RESPONSE Real-time WhatsApp status updates at every processing stage — full transparency

5.2 WhatsApp Nurture Sequence (14 Days)

Day	Message Type	Content Focus	Goal
Day 1	Welcome + Confirmation	Analysis result confirmed, what to expect next	Set expectations
Day 2	Education	Why EMI consolidation works (3 key reasons)	Build credibility
Day 4	Case Study	Specific transformation: profile + savings numbers	Create belief
Day 6	FAQ / Objection Handling	Top 3 objections about consolidation — answered	Remove blockers
Day 8	Social Proof	Testimonial with before/after EMI breakdown	Reinforce trust
Day 10	Offer	Free personalised analysis with a senior advisor	Generate action
Day 12	Urgency	Bank rate window / limited slots for this month	Create urgency
Day 14	Final Follow-up	Last touch — keep door open, soft CTA	Re-engage / close

06 / Key Features & Functionality

6.1 Feature Priority Overview

Features are classified P0 (launch blocker), P1 (launch critical), and P2 (post-launch). Nothing P2 is built before P0 and P1 are fully operational.

Feature	Description	Priority
EMI Burden Analysis Tool	3-question self-qualifying lead magnet. Calculates projected EMI savings and captures lead simultaneously.	P0 — Critical
Niche Landing Page	Single-purpose page targeting salaried EMI overload. ICP-specific headline, social proof, EMI calculator, one CTA.	P0 — Critical
WhatsApp Nurture Sequence	14-day automated sequence via WhatsApp. Educates, builds trust, handles objections, drives consultation booking.	P0 — Critical
Lead Capture & CRM Pipeline	Tracks every lead from entry through qualification, nurture, consultation, document submission, and disbursal.	P0 — Critical
Sales Conversion Scripts	Stage-specific WhatsApp scripts and call scripts for every pipeline stage. Removes dependence on agent improvisation.	P1 — High
EMI Trap Stories Reels Series	Instagram Reels content series: real transformation cases with specific numbers. Feeds top of funnel.	P1 — High
Agent Dashboard	Sales agent view: assigned leads, pipeline stage, pending actions, WhatsApp log, call notes.	P1 — High
Admin Performance Dashboard	Owner view: total leads, stage-wise conversion rates, disbursal volume, agent performance.	P1 — High
Lead Scoring System	Auto-score incoming leads against ICP criteria (salary range, EMI burden, CIBIL estimate). Prioritises high-value leads.	P1 — High
Document Collection Flow	WhatsApp-native document request and collection. Status tracking visible to both agent and lead.	P1 — High
Case Study Library	Repository of anonymised real cases: profile, loan structure, savings achieved, bank used. Repurposable across all channels.	P2 — Medium
Referral Capture Module	Enables existing clients to refer new leads. Tracks referral source and conversion.	P2 — Medium
Bank/NBFC Fit Matrix	Internal tool mapping customer profiles to optimal bank/NBFC partners. Reduces placement time.	P2 — Medium

6.2 EMI Burden Analysis Tool — Detailed Spec

This is the core lead magnet and the first product touchpoint. It must accomplish two things simultaneously: qualify the lead against ICP criteria AND deliver immediate perceived value.

Input Fields (3 Questions Only)

- Q1: Monthly salary (₹ range selector)
- Q2: Total monthly EMI across all loans
- Q3: Number of active loans / credit cards

Output to User

- Projected monthly savings range (₹X – ₹Y)
- Estimated new consolidated EMI
- Simplified 3-step explanation of process
- CTA: 'Get your free personalised analysis on WhatsApp'

Qualification Logic (Internal)

- EMI-to-income ratio > 40% → High Priority
- EMI-to-income ratio 30–40% → Medium Priority
- EMI-to-income ratio < 30% → Low Priority / Disqualify
- 3+ loans → Flag for consolidation suitability

Data Captured

- Salary bracket, EMI burden, loan count
- Name + WhatsApp number (required to see results)
- Lead score auto-assigned at submission
- Timestamp, source (ad / organic / referral)

6.3 CRM Pipeline Stages

Stage	Definition	Exit Criteria
1. New Lead	Lead submitted EMI analysis form. Not yet reviewed.	Reviewer scores against ICP criteria
2. Qualified	Meets ICP criteria. Assigned to sales agent.	Agent sends Day 1 WhatsApp within 2 hours
3. In Nurture	Active in 14-day WhatsApp sequence.	Lead responds or requests consultation
4. Consultation Booked	Call/meeting scheduled with agent.	Consultation completed and notes logged
5. Docs Requested	Agent has sent document checklist.	All required docs received
6. Docs Received	Complete document set in hand.	File submitted to bank/NBFC
7. Processing	File submitted to lender.	Sanction letter or rejection received
8. Sanctioned	Loan approved by lender.	Customer signs and disbursal initiated
9. Disbursed	Loan amount credited to customer.	Stage complete — referral request triggered
10. Disqualified	Does not meet ICP or lender criteria.	Archived with reason code

07 / Design System

7.1 Brand Identity Principles

Design Philosophy

FCD's visual identity communicates three things above all else: Trust, Competence, and Clarity. This is financial services targeting stressed borrowers. Every design decision should reduce cognitive load, increase perceived credibility, and make the next step obvious.

Avoid: excessive decoration, playful tones, startup aesthetics, cluttered layouts.

Target: professional, clean, serious-but-warm — the aesthetic of a trusted advisor, not a fintech app.

7.2 Colour System

Primary Palette

Navy Primary #0A1F44	Action Orange #E8500A	Navy Deep #1E3A6E	Surface Light #F2F5FA	White #FFFFFF
--	---	---	---	-------------------------------------

Secondary & Status Palette

Success Green #1A7A3A	Alert Red #CC3300	Warning Amber #D97706	Info Blue #1A5276	Neutral Text #6B7280
---	---	---	---	--

7.3 Typography

Element	Font	Size / Weight	Usage
Hero Headline	Inter / Poppins	48–56px, 700	Landing page primary CTA
Section Heading (H2)	Inter / Poppins	32–36px, 700	Page section titles
Sub-heading (H3)	Inter / Poppins	22–24px, 600	Feature titles, card titles
Body Copy	Inter	16px, 400	All descriptive text
Body Emphasis	Inter	16px, 600	Key stats, important body phrases
Caption / Meta	Inter	13–14px, 400	Timestamps, labels, footnotes
CTA Button Text	Inter	16–18px, 700	All primary action buttons

Element	Font	Size / Weight	Usage
Number / Stat Display	Poppins	36–48px, 700	EMI savings, social proof numbers

7.4 Spacing & Layout Grid

Base Spacing Unit: 8px

- 4px — micro gaps (icon to label)
- 8px — compact internal padding
- 16px — standard element spacing
- 24px — section internal padding
- 32px — component separation
- 48px — major section breaks
- 64px+ — page section separation

Layout Principles

- 12-column grid for desktop (max 1280px wide)
- 4-column grid for mobile
- Content max-width: 720px for readability
- Left-aligned text — never full-justified
- One primary action per screen view
- Whitespace is deliberate, not wasted
- No more than 3 visual hierarchy levels per section

7.5 Component Library

Button States

Variant	Visual Spec	Usage
Primary CTA	BG: #E8500A, Text: White, Radius: 6px, Padding: 16px 32px	Single primary action per screen — e.g. 'Calculate My EMI Savings'
Secondary	BG: White, Border: #0A1F44, Text: #0A1F44, Radius: 6px	Supporting actions — e.g. 'Learn More', 'See Case Study'
Disabled	BG: #D0D9EA, Text: #6B7280, no interaction	Form incomplete or unavailable actions
Destructive	BG: White, Border: #CC3300, Text: #CC3300	Disqualify lead, remove entry
WhatsApp CTA	BG: #25D366, Icon: WhatsApp, Text: White	WhatsApp-specific contact triggers

08 / UI Guidelines

8.1 Landing Page Structure

The landing page has one job: convert a salaried borrower who is aware of their EMI pain into a qualified lead. Every element is ruthlessly evaluated against this single objective.

Section	Component	Content / Spec
1	Hero Section	Headline: 'You're paying ₹30,000 more EMI than you should be.' Sub: 'Find out exactly how much you can save — free analysis in 60 seconds.' CTA: Orange button → EMI Tool
2	Pain Validation	3-stat strip: '₹50,000 average monthly overpayment 3+ loans is the tipping point 10+ years placing consolidation loans' — no icons, no decoration
3	EMI Analysis Tool	Embedded 3-question form. Result shown inline. WhatsApp capture before result. Auto-triggers Day 1 nurture.
4	How It Works	3 steps, numbered, no fluff. Step 1: Share your loan details. Step 2: We find the right bank for your profile. Step 3: Single EMI, lower outflow.
5	Case Study	1 specific transformation. Real numbers. Before/after. Outcome. No name required — profile description is enough.
6	Social Proof	3 testimonials. Each with: outcome (EMI reduction amount), profile type (salaried, X salary range), source (Google / JustDial). Star rating.
7	Trust Signals	Bank partner logos, '10+ years experience', 'RBI-regulated partners', '500+ consolidations completed', HTTPS + secure form badge.
8	Final CTA	Repeat primary CTA. WhatsApp number clearly visible. Response time commitment: 'We respond within 2 hours.'

8.2 Mobile-First Rules

Must-Have Mobile Specs

- CTA button: full-width, minimum 52px height
- Font: minimum 16px body (no zooming required)
- Input fields: minimum 48px touch target
- WhatsApp CTA: sticky bottom bar on mobile
- Page load: under 2.5 seconds on 4G
- Form: maximum 3 fields visible at once

Critical Don'ts

- No horizontal scroll at any breakpoint
- No pop-ups that cover the CTA on mobile
- No auto-play video (data cost sensitivity)
- No carousel on mobile hero — single clear message only
- No multi-column layouts on screens below 600px
- No form submission that refreshes the page — show result inline

8.3 CRM / Agent Dashboard UI

Agent View — Required Elements

- Pipeline board: leads grouped by stage
- Each lead card: name, EMI burden, lead score, last contact date
- Red flag: leads not contacted within 24 hours
- Quick actions: Send WhatsApp, Log call, Move stage, Request docs
- Daily task list: prioritised by lead score + urgency
- WhatsApp message templates: one-click send with personalisation

Admin View — Required Elements

- Top: total leads this week / month, stage-wise funnel chart
- Conversion rate by source (ad / organic / referral)
- Agent performance table: leads assigned, follow-up rate, conversions
- Stalled leads alert: leads in same stage > 5 days
- Revenue forecast: disbursements in process × average commission
- Source performance: which content / ad is generating best leads

8.4 Copy & Tone of Voice Guidelines

Core Tone Principles

FCD speaks like a knowledgeable friend who happens to be a loan expert.
Not like a bank. Not like a startup. Not like a salesperson.

Authoritative but not arrogant. Direct but not aggressive. Empathetic but not patronising.
Always speak in outcomes, not features. Always use the customer's numbers, not generic ranges.

DO NOT Write	WRITE THIS INSTEAD
We offer best-in-class debt consolidation solutions	We've helped 500+ salaried professionals reduce their EMI by ₹30,000+/month
Apply now and get best loan offers	Tell us your loans in 60 seconds — we'll show you exactly what you can save
Our experienced team will guide you	You'll know which bank is right for your profile before we ask for a single document
Competitive interest rates from top banks	EMI reduction of ₹25,000–₹45,000/month is realistic for your profile
Hassle-free and paperless process	3 documents. WhatsApp. Done in 72 hours.

09 / Success Metrics & KPIs

9.1 Primary KPIs

Metric	Target	Measurement
Monthly qualified leads	50+ in Month 1, 150+ by Month 3	CRM — qualified lead count
Lead → Consultation rate	> 30%	CRM — stage 2 to stage 4 conversion
Consultation → Docs Submitted rate	> 50%	CRM — stage 4 to stage 6 conversion
Docs → Disbursal rate	> 60%	CRM — stage 6 to stage 9 conversion
Overall lead → disbursal rate	> 10%	CRM — end-to-end conversion
Monthly disbursals	10+ in Month 2, 30+ by Month 4	Bank / NBFC confirmation records
Average EMI reduction delivered	> ₹25,000/month per case	Pre/post EMI data at disbursal
WhatsApp response rate (Day 1)	> 60%	WhatsApp analytics

9.2 Content & Top-of-Funnel KPIs

Metric	Target	Measurement
Landing page conversion rate	> 8% (visitor to lead)	Google Analytics / form tracking
EMI Tool completion rate	> 70% of form starters	Form analytics
Cost per qualified lead	< ₹500	Ad spend / qualified lead count
Instagram Reels reach per post	> 10,000 views in first 48 hours	Instagram Insights
WhatsApp opt-in rate from landing page	> 60% of form submitters	CRM source tracking

10 / Constraints & Out of Scope

10.1 Hard Constraints

What We Are Building

- One high-conversion landing page (salaried EMI niche only)
- EMI Burden Analysis lead magnet (3-question, WhatsApp gate)
- 14-day WhatsApp nurture sequence
- CRM pipeline with 10-stage lead tracking
- Sales agent dashboard with pipeline + templates
- Admin dashboard with conversion + revenue reporting
- Instagram/Facebook content system (Reels + static)

What We Are NOT Building

- Mobile app (iOS or Android)
- Customer-facing portal or loan dashboard
- Internal loan comparison / aggregation technology
- Chatbot or AI-powered loan assessment
- Multiple landing pages for different niches (phase 2 only)
- Home loan or business loan vertical (out of scope currently)
- Automated disbursal processing (stays manual / agent-led)

10.2 Non-Negotiable Principles

These rules govern every build decision

1. Speed of execution beats perfection. Ship the core machine before optimising.
2. Nothing gets built unless it improves lead quality, conversion rate, or disbursal volume.
3. WhatsApp-first. Every customer touchpoint must work natively on WhatsApp.
4. Niche before scale. Own salaried EMI overload completely before expanding to other segments.
5. Post-lead execution is the product. Generating leads is table stakes. Converting them is the business.
6. Human advisory, not tech platform. FCD's differentiation is expertise and responsiveness — not automation.

10.3 Document Version Log

Version	Date	Changes	Author
v1.0	March 2026	Initial PRD — full specification for FCD acquisition engine	Internal
